INTERNATIONAL JOURNAL OF CIRCUIT THEORY AND APPLICATIONS, VOL. 18, iii–v (1990)

CONTENTS

Volume 18, Issue Nos 1–6

International Journal of
CIRCUIT THEORY AND APPLICATIONS

Issue No. 1, January–February 1990

Editorial i

The Large-change Sensitivity Network: D. Aeyels and J. L. Willems 1

Limitations and Complexity of Digital Hardware Simulators Used for Large-scale Analogue Circuit and System Dynamics: T. Roska 11

The Dynamics of a Non-linear Discrete Oscillator: Jingtang Wu and Yongyi Yang 23

A Transformation Method for the Solution of Power Switching Circuits Based on Network Topological Concepts: J. Milias-Argitis and Th. Zacharias 33

Analysis and Design of Self-limiting Single-op-amp *RC* Oscillators: J. L. Huertas, B. Pérez-Verdú and A. Rodríguez-Vázquez 53

Development of a Symmetrically Stabilized Four-phase Oscillator and Some Implications: B. Z. Kaplan and D. Yardeni 71

LETTERS TO THE EDITOR

A Two-transistor Negative-resistance Device without Feedback Structure: Jingtang Wu, Jian-She He and Xi-Yu Du 85

Dynamics of the Inclusions Appearing in the Return Maps of Chua's Circuit. Part II: The Annihilation Mechanism: C. Kahlert 89

A Delay Time Bound for Distributed Parameter Circuits with Bipolar Transistors: C. A. Marinov and P. Neittaanmäki 99

Issue No. 2, March–April 1990

Design of Recursive Digital Filters with Variable Characteristics: S. K. Mitra, Y. Neuvo and H. Roivainen 107

Linear Frequency Networks with Applications to 'Frequency Set-on Oscillators' and 'Self-adaptive Bandpass Filters': J. D. Rhodes 121

The Convergence of a PLL with Variable Parameters: D. Wulich and M. Bar 135

Indexed or abstracted by Cambridge Scientific Abstracts, Current Contents, Engineering Index Inc., INSPEC, Mathematical Reviews, Science Citation Index, SCISEARCH Database, Zentralblatt für Mathematik

A Pole–Zero Pairing Strategy for Minimum-gain-sensitivity *n*th-order Biquadratic Filter Cascades: A. Hiltgen and G. S. Moschytz 145

A Method for Finding Bounds on the Location of all the Solutions of DC Piecewise-linear Circuits: M. Tadeusiewicz 165

Periodic, Intermittent and Chaotic States of Clocked Autonomous Digital Systems: J. H. B. Deane and D. J. Jefferies 175

An Improved Macromodel for Operational Amplifiers: Chenmin Hu, D. P. Leach and Shu-Park Chan 189

LETTERS TO THE EDITOR

A Few Theorems Concerning Pairs of Matroid Bases: L. A. Novak 205

Active *RC* Filters with Very Low Sensitivity: A. Petraglia, J. Szczupak and S. K. Mitra . . 209

Issue No. 3, May–June 1990

Generating Randomness from Chaos and Constructing Chaos with Desired Randomness: L. O. Chua, Yong Yao and Qing Yang 215

Chaos and Fractals from Third-order Digital Filters: L. O. Chua and T. Lin 241

An Interval Method for Finding all Operating Points of Non-linear Resistive Circuits: L. V. Kolev and V. M. Mladenov 257

On the Minimum Hybrid Rank of a Graph Relative to a Partition of its Edges and its Application to Electrical Network Analysis: H. Narayanan 269

A Global Delay Model for Domino CMOS Circuits with Application to Transistor Sizing: S. M. Kang and H. Y. Chen 289

Criteria for the Existence of Impulse Responses and Kernel Representations for Linear Maps: D. Ball and I. W. Sandberg 307

LETTER TO THE EDITOR

An Analysis of CCPLL Behaviour in the Presence of Noise: D. Wulich, E. I. Plotkin and M. N. S. Swamy 319

Issue No. 4, July–August 1990

A Fast Linear Programming Approach to the Design of 1D IIR Digital Filters: N. Papamarkos and G. Vachtsevanos 325

On a Family of New Two-op-amp Switched-capacitor Biquads for High-Frequency Applications: J. J. Mulawka, A. D. Konczykowska and M. L. Bon 335

Boundary Surfaces in Sequential Circuits: V. Špány and L. Pivka 349

Transformerless Synthesis of Transistor and Thyristor Switching RLC 1-Ports: W. S. Kropacz, K. Mikołajuk and A. Toboła 361

A New Approach for Automatic Fault Diagnosis in Analogue Circuits: A. A. Hatzopoulos and J. M. Kontoleon 387

Curve-search Algorithm for DC Analysis of Non-linear Electronic Circuits: A. I. Petrenko and A. R. Omer-Imerely 401

Geometric Approach to VLSI Layout Compaction: X.-M. Xiong and E. S. Kuh 411

Issue No. 5, September–October 1990

A New Biquadratic Topology for MOSFET-C Filters Using Non-balanced Structures: A. Liberatore, S. Manetti and M. C. Piccirilli 431

Variable Dimension Algorithms for Solving Resistive Circuits: L. Vandenburghe and J. Vandewalle 443

Bounds on Solutions of Non-linear Resistive Networks: J. Cel 475

Analysis of White and $f^{-\alpha}$ Noise in Oscillators: F. X. Kaertner 485

Upper Bound on the Number of Equivalent Oscillator-Notch Filter Circuits: A Group Theoretical Approach: P. Raadhakrishnan and B. V. Rao 521

LETTER TO THE EDITOR

OP Amp Relocation and the Complementary Transformation: J. A. Svoboda 535

Issue No. 6, November–December 1990

Fractal Pattern of Second-order Non-linear Digital Filters: a New Symbolic Analysis: L. O. Chua and T. Lin 541

An Efficient Algorithm for Analysis of Piecewise-linear Resistive Circuits: Driving-point and Transfer Characteristic Plots: Q. Huang and R.-W. Liu 551

Realization of Complex Digital Filters Based on the LBC Two-pair Extraction Procedure: S. I. Acha and F. Torres 563

Dissipativity as a Unified Approach to Sandberg–Willson-Type Properties of Non-linear Transistor Networks: C. A. Marinov 577

A One-dimensional Model of Dynamics or a Class of Third-order Systems: M. J. Ogorzałek . . 595

Resistive Circuit Topologies that Admit Several Solutions: M. Fosséprez and M. Hasler . . . 625
